Brown bag school lunches continue to be the preferred school lunch approach for the vast majority of families. Survey results demonstrate that overall 67% of American families are sending their kids to school with lunches prepared at home. For millennials, the number rises to 70%. It’s not just once a week either; one-third of parents pack lunches five days a week.
INSIGHT #2  Kids Get in the Act

Mom is still the “main player” in most families (56%) when it comes to packing school lunches but, in almost a quarter of all families, packing sack lunches is a “together” task. Among GenX families, kids are most involved putting together their lunches, a factor of being older and wanting a say about what goes into the bag.

Top 5 Homemade Foods for School Lunches
1. Cookies
2. Soup
3. Bread
4. Applesauce
5. Pudding

Typically, who prepares lunch for the kids?

- **Mom**
  - Millennials: 63%
  - Gen X: 51%
  - Overall: 56%

- **Dad**
  - Millennials: 11%
  - Gen X: 12%
  - Overall: 15%

- **Together**
  - Millennials: 23%
  - Gen X: 22%
  - Overall: 23%

- **Kids**
  - Millennials: 3%
  - Gen X: 9%
  - Overall: 6%

INSIGHT #3  Money Matters

Which are the two most important factors on the following list when selecting products for your children’s lunches?

- **#1** Grocery Budget/Savings
  - Millennials: 59%
  - Gen X: 60%
  - Overall: 59%

- **#2** Nutrition
  - Millennials: 53%
  - Gen X: 58%
  - Overall: 56%

Families continue to be budget-conscious when it comes to food shopping. For three-quarters of all parents, saving money on the products they buy and pack for school lunches is “important” or “very important.” When asked their top criteria for selecting products for lunches, “saving money” and “nutrition” rose to the top across all demographics.
As Americans take strides to make more healthful food choices, this behavior influences both foods eaten at home and away from home. Most parents believe a “home-packed lunch is healthier” than a lunch not prepared at home. Parents, especially millennial parents who have the youngest children, have a keen desire to “know what my child is eating,” as well as “how much food at lunch is actually eaten.”

A major concern for parents is making sure the foods they pack for their children’s lunches are actually eaten. They often walk a fine line between packing “healthy foods” they feel good about and “tastier” foods their kids will actually eat. For 70% of survey respondents, “healthy” is the top criteria for foods packed in lunches, followed closely by “kids prefer it” at 60%. When asked their definition of healthy, most families agree it’s important to get their kids to eat more fruits and vegetables, along with whole grains and fiber, while reducing consumption of processed foods.

</tbody>
</table>

Sandwiches, fresh fruit, yogurt and juice boxes are first to go into the school lunch bag. These all-American “lunchables” are time- and kid-tested. As American appetites for ethnic foods expand, quesadillas, tacos, burritos, edamame and even sushi are also finding their way into some school lunches. But skip the fresh veggies. A quarter (27%) of parents report them as the item most likely to be uneaten in their children’s lunches.

Insight #7  
Food Power

Eating breakfast has long been promoted as a key to classroom learning success, a connection with a halo effect on healthful school lunches. This message is reaching parents of all ages loud and clear, with more than three-quarters (83%) saying what a child eats is “very important” or “important” to their ability to achieve success in school.

How important are the foods your child eats to their ability to learn/success in school?

- Millennials
- Gen X
- Overall

Very important: 46% 48% 47%
Important: 36% 37% 36%
Neutral: 9% 6% 7%
Unimportant: 1% 1% 1%
Very unimportant: 0% 0% 0%
In addition to wanting to make sure the right foods are packed and eaten at school each day, many parents are also motivated to pack school lunches to ensure their child’s special dietary needs or goals are met. Among the families surveyed, there were a range of health or lifestyle concerns taken into consideration, with obesity, ADHD/ADD, and gluten-free being the most prevalent.

Methodology
Data cited in this Measuring Cup Report is derived from an external independent panel fielded in July 2015, consisting of 1,021 U.S.-based participants (50% female/50% male) using age and gender filters to provide a representative sample of parents with school-age children.

About Allrecipes
Allrecipes, the world's largest food-focused social network, receives more than one billion visits annually from family-focused home cooks who connect and inspire one another through photos, reviews, collections, profiles, and videos. Since its launch in 1997, the Seattle-based social site has served as a dynamic, indispensable resource for cooks of all skill levels seeking trusted recipes, entertaining ideas, everyday and holiday meal solutions and practical cooking tips. Allrecipes is a global, multi-platform brand with 19 sites, three mobile apps, and 15 eBooks serving 24 countries in 13 languages. In November 2013, Allrecipes magazine launched nationwide with six bi-monthly issues.

About Meredith Corporation
Meredith Corporation (NYSE:MDP; www.meredith.com) is the leading media and marketing company serving American women. Meredith features multiple well-known national brands—including Better Homes and Gardens, Parents, Family Circle, Allrecipes.com, Fitness, American Baby and EveryDay with Rachael Ray—along with local television brands in fast-growing markets. Meredith is the industry leader in creating content in key consumer interest areas such as home, family, food, health and wellness and self-development. Meredith uses multiple distribution platforms—including print, television, digital, mobile, tablets, and video—to give consumers content they desire and to deliver the messages of its advertising and marketing partners.
